User Interview 2 — Abhishek (Early Career, Direction Seeking)

👤 Profile

- Name: Abhishek Sharma
- Age: 24
- Role: Junior Ux Researcher
- Experience: 1 year

Q: How do you approach your career development?
A: I try to stay proactive. I read job descriptions and see what skills are required... but it's still a bit unclear what I should focus on.
Q: What platforms do you use?
A:LinkedIn mostly, and sometimes Coursera. I also compare myself with others to see what they're doing.
Q: What challenges do you face?
There's no clear path. Everyone says different things. Some say learn product development, others say focus on business skills.
Q: How do you decide what to learn?
A: That's the problem... I don't really know. I just pick something and hope it's useful.
Q: What would help you most?
A: A structured plan. Like, what should I learn in the next 3–6 months to grow in my career and a pivot point from where I am right now
Q: How do you feel about your current progress?
A: I feel like I could be doing more... but I'm not sure what the right direction is.

P.S Interview was conducted in-Person
